Central Coast Genealogical Seminar

Presented by

The San Luis Obispo Genealogical Society
The Santa Maria Valley Genealogical Society

We are excited to sponsor nationally recognized speakers Angie Bush, Dr. Michael Lacopo and Nancy Loe. We are proud to bring you the very latest in genealogy research, offering a DNA research track as well as a fascinating and entertaining traditional research track. Choose freely from the available sessions (mix and match!) for a day of family history instruction of a quality usually only available at big-city conferences.

Angie Bush, MS, works as a genetic genealogy researcher with Ancestry ProGenealogist in Salt Lake City. In addition, she volunteers as Region 1 Director and chair of the Genetic Genealogy committee for the National Genealogical Society. A popular speaker and presenter, she enjoys attending conferences where she can connect with others.

Dr. Michael Lacopo, author of the popular genealogy blog, *Hoosier Daddy?*, has been actively researching and doing client work since 1980. A lifelong resident of northern Indiana, he has published numerous books and journal articles; he also lectures regionally, nationally and internationally.

Nancy Loe has worked professionally in libraries and archives for four decades. Her experience with primary sources and genealogical research will help you start your own research or get it back on track.

Our beautiful library is located in downtown Santa Maria, one-half block south of the Town Center Mall. Ample FREE parking is available at the library as well as at the mall. The library has a small café serving sandwiches and salads. In addition, the mall offers many lunch options such as:

Combo Express: Chinese
Dairy Queen
Deckers: Burgers
Hot Dog on a Stick
Red Robin

Semplice: Italian
SLO Grind: coffee, tea and sandwiches
Subway: sandwiches
Taqueria: Mexican
Teriyaki: Japanese

Please be sure to circle the sessions that you think you would like to attend on the reverse (you may change your mind the day of the seminar). This will help us assign the proper rooms to each speaker.
